Temperature Rating of Product Components		
° F	Angle Flange	
1100°		<b>Optional -</b> 304SS
390°	Galvanized Steel	
-60°		

Additional Notes
At temperatures ranging between 390° F and 480° F, the zinc-iron alloy layers in galvanized steel will continue to provide a high level of protection from corrosion. However, there may be some peeling, changes in mechanical properties, and reduction in the corrosion protection. Recommended max. service temperature is 390° F.
304SS: <ul style="list-style-type: none"> <li>• bluing may occur at 800° F and above</li> </ul>
