## Construction:

Seam: is lapped, spot welded, and caulked.

**Collars:** located on the exterior side of each port and considered as air flow non-directional. Collars have a laser welded longitudinal seam. If air flow directional product is required, it must be stated on the PO and additional cost may be incurred. A raised lap seam and spot weld are used for attaching the collar to the body and no caulking is used. If caulking is required, additional cost may be incurred.

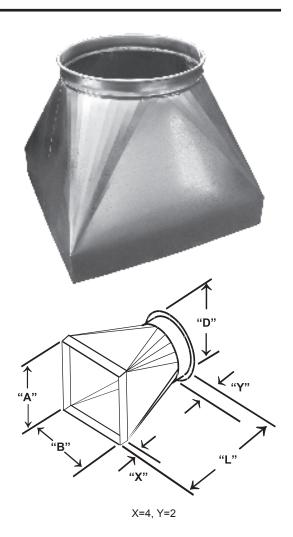

**Round End:** Standard QF end can be changed to Raw ID (RAW-ID), Raw OD (RAWOD), No Fitting (NF), Hose Adapter (RAWFLEX), Flat Flange (FFL), Angle Flange (ANGFL), or Van Stone (VAN-STONE).

**NOTE**: Reference Nordfab's QF Machine Adapter Technical Data sheet for actual ID and OD dimensions of QF collar.

Square End: Hemmed edge.

## **Hood Design Basis:**

150 fpm capture velocity 2 ft. distance from source

## QF Canopy Hood 3270
